

Quality Policy of AIGO-TEC Sp. z o. o.

We strive for zero defects (0 ppm) in production and services.

We are convinced that we can only achieve this goal through continuous quality improvement in consultation and cooperation with our customers and suppliers. In this way, we can ensure the future development of our company.

The management and each individual employee are responsible for the quality of our products and strive with all their actions to achieve this goal.

To achieve our goals, the Management Board has established key performance indicators which it monitors to ensure the company's intended performance and efficiency.

We are committed to meeting all customer needs, legal and official requirements. The involvement of all employees is crucial because our "Quality Concept" means not only the compliance of our products, but also the orientation of employees and processes towards our customers.

Our Quality Management System also takes into account environmental protection aspects and defines all necessary activities, responsibilities and related documentation.

AIGO-TEC's management is responsible for the development and maintenance of this system. Effectiveness is monitored through regular internal quality audits.

Our policies are as follows:

- | | |
|----------------------------|-------------------------|
| ✓ establish the standard | ✓ do not accept errors |
| ✓ disseminate the standard | ✓ do not create errors |
| ✓ follow the standard | ✓ do not forward errors |

The company's management declares the binding nature of this policy for AIGO-TEC Sp z o.o.
